

4-H Clover for Cloverbuds Induction Ceremony

The following clover may be used when building the 4-H Clover.

Supplies Needed: Cardstock or heavy paper, scissors, self-sticking hook and loop fasteners, poster board or felt board.

1. Print the clover shapes on cardstock.
2. Carefully cut the clover shapes from the cardstock.
3. After all sections are cut, put 2-3 self-sticking hook and loop fasteners on each clover shape.
4. If using the poster board, place the clover on the poster board, putting together the clover shapes to form the clover. Carefully remove the tape from one half of each hook and loop fastener to secure the clover to the poster board.
5. If using the felt board, carefully remove half of each hook and loop fastener exposing the hooks or loop to secure the clover on the felt board.
6. The completed clover should look similar to the provided pattern.
7. Use the clover leaves to build the 4-H Clover described in the Cloverbuds Induction Ceremony.
